improved aircraft productivity*

## King Air B200

### Enhanced Performance Leading Edges (EPL)

- **EPIC PERFORMANCE PACKAGES**
  - EPIC Platinum
  - EPIC Gold
- **INDIVIDUAL SYSTEMS**
  - Swept Blade Turbofan Props
  - Ram Air Recovery System
  - **Enhanced Perf. Leading Edges**
  - Dual Aft Body Strakes
  - High Flotation Gear Doors
  - Crown Wing Lockers

# How do they work?

A key part of the B200 EPIC Performance Package, Enhanced Performance Leading Edges significantly improve climb and cruise performance and reduce stall speeds, along with other benefits.

## Benefits

- Increased cruise speeds
- Reduced stall speeds
- Increased outboard wing life
- More efficient air conditioning through improved intercooler efficiency
- Excellent low speed flying qualities and stall characteristics

## Technology

- Modern aerodynamic airfoil improves airflow
- Composite construction for strength and weight savings
- Recessed flush-mounted de-icing boots minimize drag
- Extended de-icing boot material protects intercooler inlet from foreign object damage
- Optimize intercooler inlet and ducting
